

1/2 The Cost Of Explosion-Proof, with Megawatt Capacity

Sub-MiniPurge® pressurization systems allow electrical equipment normally suitable for only Non-Classified areas to be used in hazardous "Division 2, Groups A thru D" locations. Mounts to commercially-available, lightweight, easy-to-access enclosures. No limit on enclosure window size. No limit to equipment power capacity (megawatts are common). MiniPurge systems are Factory Mutual approved to current USA NFPA 496, 1993 standard. Appropriate for:

- Computers & Monitors
- Gas Analyzers
- 19" Rack Apparatus
- Electric Motors
- Data Recorders
- High-Power Equipment
