Honest!

Protection & Comfort

Welders can always see, with full eye and face protection in place. Speedglas lenses automatically darken the moment an arc is struck. UV/IR protection is constant, whether the lens is light or dark, ON or OFF.

Think of PAPRs (Powered Air-Purifying Respirators) and you probably think: "Bulky, heavy and that blasted battery's always in the way!"

Not anymore. Introducing the **Speedglas® Fresh-air™ II P system** ("P" for Particle filtration). The exclusive, all-new, patented design:

- 1) Eliminates the battery as a separate, cumbersome entity.
- 2) Reduces the size of the turbo unit.
- 3) Reduces the overall weight.
- 4) Redistributes the weight (i.e. heavy components close to the welder, lighter components further away).

Welders using the new system are very enthusiastic about its comfort and "wearability"...in some cases, it's the first time welders have ever agreed to wear respirators! Assigned Protection Factor (APF) of 25. Respirator Approval: NIOSH 42 CFR 84.

Battery can be in turbo unit or removed for charging.

Battery changes are quick and easy...the welder doesn't even need to take off the system.

Just one large filter, instead of the traditional three small filters, is needed.

New one-way valve on face seal keeps welders more comfortable than ever.

Flame-resistant head cover for spark protection.

The exclusive Speedglas® SideWindows™ peripheral vision lenses.

An extremely compact, lightweight turbo unit with convenient battery pack that holds up to an 8-hour charge.

ALL NEW TURBO!

Other Speedglas® Safety Equipment:

Available late 1998:
Speedglas Fresh-air II
G system ("G" for
Gas filtration). Can
be used with
Speedglas cartridge
filters HE/OV/SD/CL/
HC (AEP3) or
HE-particulate filters (P3),
dependent upon a given
environment or application.

Speedglas Fresh-air SA
(Supplied Air) Systems:
for respiratory protection
from very high levels of
harmful gases and particu-
lates. Approval: NIOSH 30
CFR 11 (pending NIOSH
42 CFR 84). Used with
Speedglas Fresh-air PRP
200 B Purification and
Regulation Panel.

A Welding Helmet That
Breathes! The Speedglas
9000 helmet features four
specially-designed aerodynamic exhaust vents that reduce
carbon dioxide build-up, as well as heat and humidity.
Welders feel less fatigued, more clear-headed.
